Date: September 24-25, 2018

Place: University Jaime I School of Medicine

Course: Surgical & Prosthetic Cadaver Hands-on Workshop

Instructors: 5 instructors

 3800  Max. 20 participants

During this 2-days intensive course, participants will perform different types of surgical techniques in combination with the use of biomaterials. Each participant will place 4 demo-implants; two straight and two tilted distal implants, working in maxilla and mandible (left or right side) and perform an immediate loading protocol (maxilla and mandible) using pre-fabricated CAD/CAM acrylic prosthesis. Participants will be instructed by periodontists, maxillofacial surgeons, prosthodontists and dental technicians in treatment plan, surgical, prosthetic and laboratory procedures.

Include: Disposable uniforms, biomaterials, demo implants, restorative components, CAD/CAM prostheses, instruments, coffees, meals, certificate of attendance.
